

# Moonspin Casino Review: Sweepstakes Model, Coins, and Game Access

**Meta Title:** Moonspin Casino Review: Banking, Coins, and Games Explained

**Meta Description:** See what playing at Moonspin Casino looks like, from coins and games to bonuses and overall access, before you join.

Moonspin Casino operates as a sweepstakes-style social casino, using Gold Coins for play and Sweep Coins for prize redemptions. The platform is open to US players and does not require real-money gambling, with free coins from daily logins and other prizes we'll come up with in this review.

## Introduction with Moonspin Casino

Moonspin Casino is set up as a sweepstakes social casino using two virtual currencies. It is owned by Solar Bloom LLC and is open to US players under a sweepstakes setup rather than real-money gambling.

In terms of game variety, Moonspin does not stand out, listing around 1,000 titles from 25 providers. There is no live casino section, and gameplay stays focused on standard digital titles. Purchases start at \$0.99, with Sweep Coins added as a bonus to selected Gold Coin packages.

Prize redemptions can only be requested with Sweep Coins and require identity verification first. The minimum redemption is 100 SC, and processing times are listed at up to five working days. Support is available through live chat and email, with the site accessible in both English and Spanish.

Here are some positives and limits that stood out while reviewing:

### Pros

- Dual currency system using Gold Coins and Sweep Coins
- Daily login prizes
- Minimum purchase set at \$0.99
- 60,000 GC + 3 SC no deposit bonus

## Cons

- There's no live dealer section
- No cash withdrawals
- Crypto isn't supported at the moment
- No dedicated iOS and Android apps

## Moonspin Casino Games and Providers

Moonspin doesn't lean on the usual casino mix. Even with more than 1,000 games on the site, the selection doesn't revolve around popular slot releases. Around 25 providers are represented, including Zone, Playson, BGaming, and Hacksaw Gaming.

Games are spread fairly evenly across different formats. Alongside standard slot-style titles, there are instant win games and bingo options. A live casino isn't part of the setup, and table games are limited, with only a single roulette variation currently available.

Moonspin also adds its own small set of original games. There are 8 in total, covering formats like Limbo and Charts. Blackjack is listed as planned for release, while poker and baccarat aren't part of the current offering.

## Moonspin Casino Bonuses & Promotions

After creating your Moonspin Casino account, you are eligible for a welcome bonus totaling 200%, up to 60,000 Gold Coins + 30 free Sweep Coins. The bonus is only available to US residents, with a minimum \$9.99 purchase. You can then head to the "My Bonuses" section to claim the offer, which comes with a 1x wagering requirement.

Outside the first purchase offer, several ongoing promotions rotate on Moonspin.

- **2nd Purchase:** Go back in with at least \$9.99, and the second offer kicks in, adding a 150% boost made up of 50,000 Gold Coins and 25 Sweep Coins.
- **Daily Bonus:** A quick daily check-in adds 1,000 Gold Coins and 0.5 Sweep Coins, as long as the Sweep Coin balance hasn't gone over 1 SC.
- **Spin to Win Promotion:** Hit a 100x multiplier or more on one of the Moonspin Originals, and you'll unlock 30 free spins on *Legacy of Lost Gold*. This can be claimed

once every seven days.

- **Tournaments:** Tournaments show up from time to time, with prizes handed out based on where players land on the leaderboard.

Time spent playing also counts toward Moonspin Elite. XP builds up as you play, moving accounts through the VIP levels, where things like Free Spins, Cashback, and other extras start to unlock. Each level comes with its own XP range.

Moonspin lets you try the site first by handing out a total of 60,000 GC and 3 SC, spread across 3 days after your first login and email confirmation. It's a slow release, but nothing needs to be bought.

- **20,000 Gold Coins per day**
- **1 Sweep Coin per day**
- **No purchase needed**
- **1x playthrough**

## Play or Skip?

Moonspin suits players who are curious about sweepstakes casinos that don't follow the usual layout. Daily rewards, a no-deposit bonus, smaller promotions, and an XP-based VIP program give it some structure over time.

That said, it won't fit everyone. There's no live casino, table games are very limited, and many well-known slots are missing. Redemptions also come with a few conditions, including KYC and Sweep Coin limits, which may slow things down.

Overall, Moonspin makes sense if you're interested in a sweepstakes setup with original games, free coins to start with, and a slower, more casual pace. Those looking for a full casino lineup or instant cash-style play may want to look elsewhere.

Moonspin Casino is under active review, with early checks already completed. Further testing is in progress, and the full review will be published soon. Adapt
